

BRAND BOOK · VERSION 1

connectly

A verified community that helps you get matched.

Working name. Trademark clearance has not been done.

THE IDEA

A doorway, not a catalogue.

What we are

A community where verified people meet. Not a photo wall. A man writes a note and sends a request. A woman reads it and chooses: come in, or not now.

What we believe

Trust is the product. Everyone is a real person. Women decide who gets in. Nobody is ranked by a photo.

How we sound

Warm, plain and calm. We say "we help you get matched". We do not say swipe, hot or hookup.

THE MARK

One arch. One ember.

The doorway

The arch is the door. The ember dot is the person standing in it, the one warm point of life. It is simple enough to draw from memory and holds up at 16 px.

Lockup

connectly

VERSIONS

Use the right one.

Full colour on Paper or white.

Reversed on Ink.

One colour (Ink). Print, stamps, forms.

One colour (white) on dark or photos.

App icon, 1024 px master.

Give it room.

Clear space

Keep the width of the door opening free on every side. Nothing else enters this area: no text, edges or other marks.

Minimum size

Symbol: 16 px on screen, 6 mm in print. Below 24 px use the small-size cut, which has a larger dot and opening. Horizontal lockup: 96 px wide.

COLOUR

Three colours. That is all.

Ink

#10252B
RGB 16 37 43
Text, mark, dark surfaces

Ember

#F9502C
RGB 249 80 44
The person: dot, accent, action

Paper

#F6F1E9
RGB 246 241 233
Backgrounds, reversed marks

Ink does the work. Ember appears once per screen or less. Why this palette: dating apps already own coral gradients, yellow and near-black. Deep teal-ink with one warm ember reads as a lit door at night.

COLOUR RULES

Readable by everyone.

TEXT ON BACKGROUND	CONTRAST	USE
Ink on Paper	14.1 : 1	Body text
Paper on Ink	14.1 : 1	Text on dark
Ink on Ember	4.7 : 1	Text on Ember buttons
Ember on Ink	4.7 : 1	Dot and accents on dark
Ember on Paper	3.0 : 1	Graphics and large UI only, never body text
Paper on Ember	3.0 : 1	Avoid. Use Ink on Ember.

Never put Paper text on Ember. Never set body-size text in Ember on Paper.

TYPOGRAPHY

Poppins for voice, a clear sans for reading.

Aa

Poppins SemiBold

Headlines, numbers and the wordmark. The wordmark is outlined from this font (SIL Open Font License 1.1).

Aa

System sans

Body text and interface. Use Inter where it can be bundled, otherwise the device's own sans. Body 16 px or larger. Line height 1.4 to 1.5.

VOICE

Say it like a good host.

We say

"We help you get matched."
"Not now" (never "reject").
"Come in."
"A verified member reads every request."

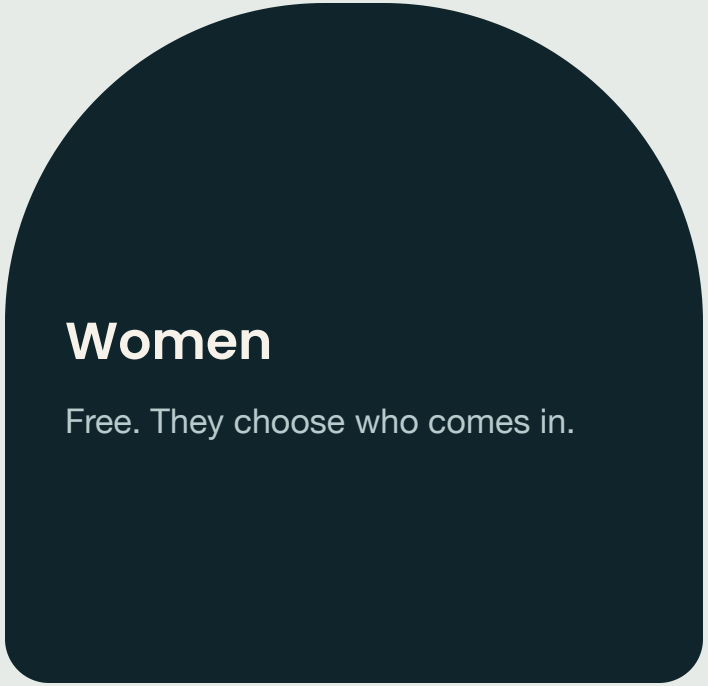

We don't say

"Swipe", "hot", "hookup".
"Rejected" or "declined".
Anything that ranks people by looks.
Promises we can't keep.

Short sentences. Plain words. Honest about money: say how many requests a pack gives and what it costs, before the person pays.

IN THE PRODUCT

Arches everywhere, quietly.

Rules of use

Arch-top shapes for people and steps. Rounded corners 18 to 28 px. One Ember action per screen, with Ink text. No profile photos anywhere: members show who they are in words.

DON'T

Keep the door intact.

Don't stretch or squash.

Don't rotate or tilt.

Don't hide the dot on Ember: the person disappears.

Don't use off-palette colours.

Also: no outlines, shadows or gradients on the mark. No text inside the arch. Don't redraw it. Use the supplied files.

FILES AND OPEN ITEMS

What to use, what is still open.

Master files

brand/final/a-doorway: symbol (colour, Ink, white, reversed), small-size cut, horizontal lockups, 1024 px app icon. All SVG, paths only.

Regenerate with brand/tools/build_brand.py. The name is one flag, so renaming is one command.

Still open

The name "Connectly" is a placeholder.
No trademark search has been done for the name or the mark: a professional search is required before launch.
Legal text in the app is a draft.
